EDUCATION

University of Minnesota: Twin Cities

Minneapolis, MN

Bachelor of Science in Computer Science

Expected: May 2028

- **GPA: 3.89 (5x Dean's List) & Relevant Coursework:** Data Structures & Algorithms, Advanced Programming Principles, Linear Algebra, Probability & Statistics, Program Design & Development, User Interface Design & Prototyping.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, Typescript, HTML/CSS, Kotlin.

Frameworks: React, Node.js, Vue.js, Angular, REST APIs.

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, PyCharm, IntelliJ

Libraries: pandas, NumPy, Matplotlib

EXPERIENCE

IT Technical Support Specialist

January 2026 – Present

University of Minnesota

Minneapolis, Minnesota

- Executed rapid incident response during a university-wide phishing attack, managing identity verification and secure access for 400+ compromised accounts to contain unauthorized system access.
- Translated complex system operations into accessible procedures for non-technical users, effectively gathering user requirements to achieve a 90% first-contact resolution rate.
- Managed a high-volume ticketing queue of 150+ tickets daily, documenting reproducible system behaviors and software edge case to streamline bug tracking and escalating 10% of critical infrastructure malfunctions to tier-3 administrators.

PROJECTS

SocialCoding.net | React Native, TypeScript, Kotlin/Ktor, PostgreSQL

June 2026 – Present

- Worked in a team of 2 to design a project lifecycle system (design docs, team formation, timelines, deliverables tracking) that **50+** teams will use to plan and ship projects, **cutting manual processes down 70%**.
- Built reusable React UI components for the events and attendance platform, including calendar views and check-in tracking, supporting 5 events and 300+ total check-ins at a 80% average attendance rate.
- Built and integrated REST APIs for JWT- and Google OAuth-based authentication, onboarding 100+ users with single sign-on and **zero reported authentication issues**.

Burrow | Typescript, Kotlin, React, PostgreSQL, Docker

August 2025 – Present

- Collaborated in a team of 5 to design a social-media platform enabling University of Minnesota students to easily collaborate by finding nearby study groups, group project opportunities and club events or meetings.
- Engineered push notifications & an interactive map showing meetings & events across the Twin Cities campus.
- Won **Most Promising Project** of 30+ teams after presenting application progress to Social Coding board members in just under 6 weeks of development.

Allersight | O1 Summit Hackathon - Raspberry Pi, Computer Vision, Python

April 2026 – May 2026

- Built the backend infrastructure and real-time data pipelines, routing live video streams from Raspberry Pi hardware to computer vision models with minimal latency.
- Engineered a dynamic 'contamination memory' state machine that continuously tracks allergen exposure across hands, tools, and surfaces, implementing logic to automatically reset states upon detecting synchronized wash events.
- Integrated LLM-driven TinyFish agents with the core detection API, creating an automated pipeline that scrapes and analyzes local restaurant menus to output safe dining recommendations based on real-time ingredient data.

LEADERSHIP

Social Coding Vice Treasurer

January 2026 – Present

University of Minnesota

Minneapolis, Minnesota

- Helped lead the largest coding club in Minnesota, **with 100+ active members**, guiding teams from ideas to the deployment of full-stack web applications.
- Expanded organization membership by **30%** by executing targeted social media campaigns, forging campus partnerships, and leading first-year outreach.
- Implemented & enforced timelines for project completion deadlines among 30 teams, mentoring underclassmen on project planning and accountability.
